Dattapara, Birulia  
Dhaka, Bangladesh.

### SKILLS

- Ui/Ux designing
- Research
- Teamwork
- Video & photo editing
- Leadership
- Effective Communication
- Critical Thinking
- Developing

### LANGUAGES

- English (Fluent)
- Bangla (Fluent)
- Hindi (Basic)
- Urdu (Intermediate)

### PROFILE

Passionate and detail-oriented UI/UX designer with a strong foundation in modern design principles and a user-centered approach. Currently a third-year Software Engineering student at Daffodil International University, I balance learning and hands-on experience to create intuitive and visually appealing digital experiences.

Skilled in critical thinking and problem-solving, I follow a structured, step-by-step design process conducting thorough research, collecting real-world data, and analyzing user needs before crafting effective design solutions. My expertise lies in modern UI trends, usability optimization, and delivering seamless user experiences.

Driven by curiosity and continuous learning, I strive to innovate and enhance user interactions through thoughtful and well-researched design choices.

### WORK EXPERIENCE

- Currently, I am learning and working simultaneously, always giving my best to improve and grow as a UI/UX designer. I have active accounts on Behance and Dribbble, where I showcase my design projects. You can explore my portfolio to see my work and design approach.

#### Nasa Space App challenge 2024

- I led the UI/UX design for Team Archean in the NASA Space Apps Challenge 2024, where our team was selected for the next two virtual rounds. I independently designed the entire user interface and experience, conducting in-depth research to ensure a user-centered and intuitive design. Our project included a game called Archean, which explores how life could evolve through chemosynthesis in the absence of light—a unique, science-driven concept blending education with interactive storytelling.
- As part of my university capstone project, I designed the complete UI for DeliveryWala, an app focused on food delivery and food rescue. The app emphasizes transparency, accessibility, and ease of use, with features tailored to reduce food waste and support communities by offering free, discounted, and time-sensitive food items.

### EDUCATION

**B.Sc. in Software Engineering** 2023 to Now  
Daffodil International University, Ashulia

**Higher Secondary School Certificate (HSC)** 2019 - 2021  
Alamgir Mansur Mintu Memorial College, Mymensingh
